

COURSE OVERVIEW

BUSINESSOBJECTS ENTERPRISE XI R1/R2: ADMINISTERING SERVERS – WINDOWS (REV B)

BOE220-SA310R2 -

Administering Servers - Windows Enterprise XI R1/R2-3 days

Course Description

This three-day instructor-led course explains and demonstrates what each server component in BusinessObjects Enterprise does and how it is configured. You will install and configure each component and learn how information flows from server to server for system processes such as logging on to the system, scheduling reports and viewing reports. You will learn to use the Central Management Console (CMC) and the Central Configuration Manager (CCM) to manage and configure the servers and will also practice troubleshooting system problems when they arise. The business benefit of this course is that it provides a foundation for System Architects/Administrators who are responsible for setting up and maintaining a BusinessObjects Enterprise platform.

Course Audience

The target audience for this course is System Architects/Administrators who are responsible for setting up and maintaining a BusinessObjects Enterprise platform.

Prerequisite Education

To be successful, you must have attended the following offerings or have the equivalent knowledge:
